Taxable value is calculated by multiplying the model year percent good factor by the cost new.

The following methods are used to determine cost new of Class 17 Vessels (Boats) 31 feet in length & longer:

1. documenting the M.S.R.P. listed in the ABOS Marine Blue Book / web site, or
2. for boats not listed in the ABOS Marine Blue Book but listed in the N.A.D.A. Marine Appraisal Guide, divide the N.A.D.A. average value by the percent good factor, or
3. for boats not listed in the ABOS Marine Blue Book or in the N.A.D.A. Marine Appraisal Guide, documenting the actual cost for the property; or
4. for boats not listed in the ABOS Marine Blue Book or in the N.A.D.A. Marine Appraisal Guide, and for which no documented acquisition cost is available:
 - a. the manufacturer's suggested retail price for a comparable boat; or
 - b. the cost new established for that boat by a documented valuation source.

The Uniform Fee for Class 17 is 1.5% of taxable value

The 2014 model year percent good applies to 2014 models purchased in 2013.

Vessels (Boats) over 31 feet in length have a residual taxable value of \$1000.
