The *Recommended Personal Property Valuation Schedules* presented herein are contained in Administrative Rule **884-24P-33**. These schedules are to be used to establish taxable value for personal property in the **2026** assessment year. When local property values are not reflected by these schedules, assessors may establish market value using other acceptable appraisal methods. If such deviations affect an entire class or type of personal property, a written report documenting the schedule changes must be presented to the Tax Commission for approval prior to their use per Tax Commission Administrative Rule **884-24P-33**.

METHODOLOGY

These valuation schedules and guides are reviewed and updated annually by the Property Tax Division. Analysis of new market data forms the basis for revision or updating the schedules. They are developed utilizing the following approaches:

Schedules for Classes 1, 2, 3, 5, 8, 10, 15, 16, 20, 25, and 27 are subject to an ad valorem tax and use the Internal Revenue Service (IRS) Class Life or an economic life developed from other research to establish average economic life which is trended to replacement cost new using the Marshal & Swift Personal Property Cost Index. Class 29, Pollution Control Equipment for NAICS subsector 324110 was established by statute.

Schedules for registered motor vehicles and recreational vehicles, subject to a Uniform Fee reflect a percent good for each model year. The percent good is developed from samples of vehicle sales data from valuation appraisal guides published by national publishers such as Price Digest and Equipment Watch. The calculation of used retail sales prices reported in the appraisal guides as a percentage of the retail price new (M.S.R.P.) or list prices establishes a percent good schedule. The classes using this methodology include: Class 6, Heavy and Medium Duty Trucks, Class 17 Vessels 31 feet in length and longer, and Class 21, Commercial Trailers. The Class 13, Heavy Equipment schedule is also developed using this methodology.

Vehicles subject to "age based" uniform fees are set by the Utah State Legislature include: Class 9, Off-Highway Recreational Vehicles; Class 9a, Street Legal ATVs; Class 9b, Snowmobiles; Class 11, Street Motorcycles; Class 14, Motor Homes, Class 17, Vessels below 31 feet in length; Class 18, Travel Trailers; Class 18a, Tent Trailers and Truck Campers; Class 21a, Other (Non-commercial) Trailers; Class 22, Passenger Vehicles; Class 22a, Small Motor Vehicles and Class 26, Personal watercraft.

APPLYING THE RECOMMENDED SCHEDULES

Taxable value for classes subject to an ad valorem tax are calculated by applying the acquisition cost against the percent good factor of the year acquired.

Taxable value for motor vehicles and recreational vehicles subject to uniform fees are calculated by multiplying the model year cost new by the percent good factor of the appropriate schedule. Cost new is determined by:

- a. documented actual cost of a new vehicle;
- b. recognized publications that provide a vehicle cost new;
- c. documenting the actual cost of a used vehicle and dividing that purchase price by the percent good factor for the applicable model year.

2026 Recommended Personal Property Valuation Schedule for Class 45 Special Qualifying Exempt Primary Residential Rental Personal Property

Per UAC 59-2-103 "Qualifying exempt primary residential rental personal property" means household furnishings, furniture and equipment that: (1) are used exclusively within a dwelling unit that is the primary residence of a tenant; (2) are owned by the owner of the dwelling unit that is the primary residence of a tenant. The exemption does not apply to property used for transient residential use, such as; motels, hotels, time shares, rehabilitation centers or residential property in short term rental pools. Property not used exclusively inside the dwelling unit, such as: club house furniture and fixtures, exercise facilities, pool equipment and furniture do not qualify for the 45% residential exemption.

Two special class codes (Class 45-5 and Class 45-8) have been developed to assist in valuing the "qualifying exempt primary residential rental personal property". The three special classes were developed using the existing Class 5, and Class 8 schedules because the property has similar economic life.

Definitions :

Item of Taxable Tangible Personal Property defined:

An Item of taxable tangible personal property means equipment, machinery, furniture or other tangible personal property that is functioning at its highest and best use for the purpose it was designed and constructed and is generally capable of performing that function without being combined with other items of personal property. An item of taxable tangible personal property is not an individual component part of a piece of machinery or equipment, but item of machinery or equipment as a whole. For example, a fully functioning computer is an item of taxable tangible personal property but the motherboard, hard drive, tower or sound card are not.

Acquisition Cost defined:

Cost of Acquisition must include all costs required to put an item into service. In addition to the cost of the item include the following costs:

1. Freight in, includes shipping costs, loading at origin, unloading at destination, crating, skidding and other applicable costs of shipping.
2. Installation, engineering, rigging, erection or assembly to include foundations, pilings, utility connections, any other such costs.
3. Excise and sales or use taxes.
4. Any other costs related to putting personal property into service are to be included in acquisition cost.

Indirect costs such as debugging, licensing fees, permits, insurance or security are not included in the acquisition cost. Refer to Utah Code Ann. **59-2-102**.
